

Math Lambalk, Avantium
Marilia Foukaraki, Cosun Beet Company

Abstract:

Innovative sugar beet processor, Cosun Beet Company and Avantium have announced their ambition to form a joint venture (JV) and jointly construct and operate the first commercial plant for the production of plant-based glycols using Avantium's Ray Technology™. In this presentation, we envision to jointly address;

- the joint capabilities, success factors and plans of the envisioned Avantium and Cosun Beet Company JV and the corresponding timelines
- the renewable product portfolio of the intended commercial biochemical plant, jointly owned by Avantium & Cosun Beet Company, and its LCA results
- the short –to midterm collaboration opportunities with like-minded value chain actors
