

Short Abstract:

Gillian Tweddle, **nova-Institut (DE)**: Tailor-made Research & Studies – the nova Approach

In this presentation we will talk about the work nova carries out and has the capability to carry out providing research and studies tailored to clients' individual needs:

- nova-Institut can support clients through different phases of their project process: we will give examples of some of the types of work we carry out such as ‘technology landscape study’ through to ‘feasibility study’.
- Methodology and expertise for studies
- Study elements and examples:
 - alternative routes to value chain chemicals via interventions with recycled or renewable carbon
 - capacity, supply, demand and trade analysis, price investigations and forecasts
 - technology scouting
- Reference studies conducted in the recent past
