INTRODUCTION

YOUR STRONG PARTNER

FOR INNOVATIVE AND SUSTAINABLE HEALTHCARE SOLUTIONS

RENOLIT Healthcare is a market unit of the **RENOLIT Group**. As the market leader in medical-grade high-value polymer products, an innovative solution provider, and a global sparring partner for our customers, we make vital contributions to human health.

THE WORLD IS CHANGING

The pace, the amount, and the types of change are increasing every day. Most of these changes are perceived as challenges not just by our customers and end-customers but also by healthcare professionals, patients, and last but not least, by each of us personally. We, at **RENOLIT** Healthcare, are deeply committed to transforming creative ideas into advanced, responsible, and market-ready solutions in a changing global environment.

HEALTHCARE IS CHANGING

To keep up and even lead change, **RENOLIT** Healthcare has developed into an innovative solutions provider. This makes us the ideal high-value polymer partner for everyone along the entire value chain to overcome challenges with collaboration, innovation, sustainability, worldwide presence, and global raw-material sourcing. Learn more on the following pages and get in touch with us!

**“TOGETHER WITH
OUR CUSTOMERS AND
PARTNERS, WE TAKE
HEALTHCARE TO THE
NEXT LEVEL.”**

TOGETHER TOWARDS HEALTH

You can watch our company movie here.

COOPERATION

NO SINGLE ENDEAVOR HAS EVER BEEN ACCOMPLISHED ALONE

For more than 50 years, **RENOLIT** Healthcare has been cooperating in teams with customers – leading medical device manufacturers, pharmaceutical companies, end-customers, and NGOs – to make vital contributions to human health. We work together with you during all life-cycle phases of a solution and customize them to your exact requirements for today and tomorrow. By combining innovation with partnership, we lay the foundation for our mutual goal:

TOGETHER TOWARDS HEALTH

"THAT'S WHY WE COLLABORATE BEYOND DISCIPLINES, TEAMS, OR COMPANIES."

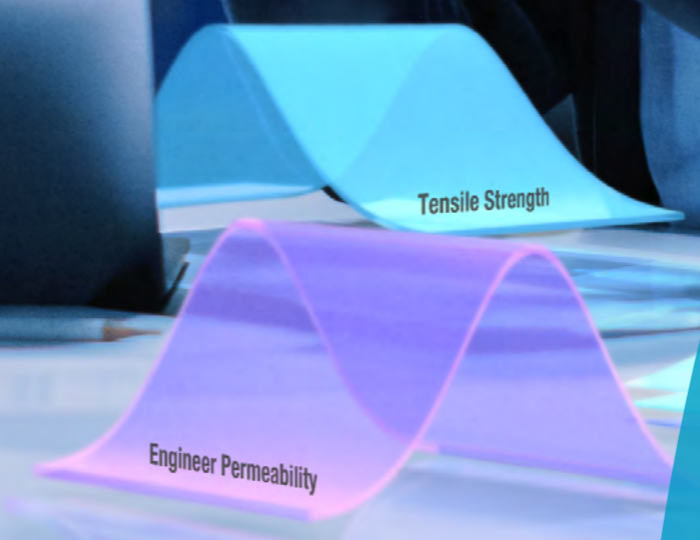

EXTRUSION MODELING TECHNOLOGY

Our new EM-Technology allows the development of the next generation in ultrathin multilayered films with unseen properties such as improved gas barrier, higher puncture resistance, and advanced flexibility. This technology improves product properties and significantly reduces raw material usage.

OPEN INNOVATION WITH PARTNERS

RENOLIT Healthcare has intensified its innovation collaboration with promising start-ups and universities. The fruits of this labor are ripe for the integration in present-day and future products: 3D filaments and precision molding for implants, fossil-free raw materials for polymers, and sensors on polymers (SOPC).

INNOVATION IS IN OUR DNA, AND WE ARE HAPPY TO SHARE IT WITH YOU

Our three global innovation centers in Europe, the United States, and China are the incubators for picking up the most current developments in order to transform them into new materials, applications, and devices. Together with you, we form mixed Research & Development teams and transform creative ideas into advanced, responsible, and market-ready solutions. We are your full-service innovative solutions provider, truly embodying our motto:

TOGETHER TOWARDS HEALTH

THE CIRCULAR ECONOMY: OUR PATH TO SUSTAINABILITY

In a human health-endangering environment, with the climate crisis, nature loss, and plastic pollution, we embrace our responsibility for today's and tomorrow's generations. Therefore, we design new and revised products for recycling, research closed-loop systems of manufacturing raw materials using CO₂, sunlight, and cyanobacteria with metabolic enhanced pathways, invent resource- and energy-saving production cycles with a minimal carbon footprint, partner with customers and end-customers on a sustainable use of our polymer solutions, and improve collection and recycling processes. Only as a circular economy are we able to fulfil our mission:

TOGETHER TOWARDS HEALTH

RENOLIT GOES CIRCULAR

Our industry and others have decided that the only viable way to become sustainable is by becoming a circular economy. Under the umbrella "RENOLIT Goes Circular," the **RENOLIT Group** has committed to implementing all five segments of the circular economy. And **RENOLIT Healthcare** has adopted this economic strategy to the specifics of the healthcare market.

AND WE ARE NOT DOING IT ALONE

True to our tagline "Together Towards Health," we are not becoming a circular economy alone, but taking our customers, end-customers, and partners with us on our path to sustainability. Everything you appreciate about **RENOLIT Healthcare** in terms of collaboration, innovation, and our proactive mindset is necessary for making sustainability a reality.

GLOBAL PRESENCE AND GLOBAL RAW MATERIAL SOURCING FOR GLOBAL CUSTOMERS

Among our four global production sites, we offer backup production for our key products if desired by our customers. This way, challenges at one site do not hamper agreed delivery terms on others. We are also at your service at your production facilities to optimize your output and processes and provide international registration support. We believe in global presence to jointly go:

TOGETHER TOWARDS HEALTH

OUR CURRENT AND FUTURE HEALTHCARE PRODUCT PORTFOLIO

RENOLIT Healthcare is the world's leading developer and producer of medical-grade high-value polymer solutions including films, tubes, and granules. Our healthcare products are spread across five fields of application and two complementary product offers. Our services include EMT equipment leasing, custom-made formulations, and tailor-made films.

FIELDS OF APPLICATION

BLOOD & BLOOD COMPONENTS

BIOTECHNOLOGY

IV & PHARMACOLOGICAL APPLICATIONS

DIALYSIS

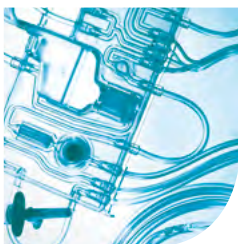

NUTRITION

COMPLEMENTARY

PORTS & CAPS

SECONDARY PACKAGING

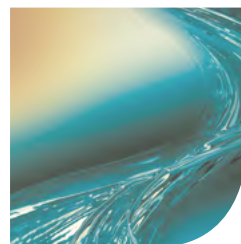

GRANULES
