Industry Partnerships for Solvent-based Cleaning Technologies for Polyolefin Recycling

Abstract

In this session, I will highlight P&G's involvement in multiple solvent-based purification technologies and our approach to bring them to the industry. The session will kick off with the 5-pillar strategy for packaging to drive Circular Economies and covers the importance of feedstock control in order to produce higher quality recyclates. The session will end with latest partnerships in the field of solvent-based purification technologies.
